

Essential Eight Managed Controls

Improve your organisation's cyber security posture via hardening controls across end-user devices.

Ensure appropriate end-user security controls to address Essential Eight requirements

CyberCX understands the importance of robust, maintained and monitored security controls for your organisation's end-user devices.

In many organisations, end user systems are inconsistently patched, and implementation of effective application control has proved challenging.

To help organisations overcome these challenges, CyberCX has developed our Essential Eight Managed Controls service - designed to accelerate your Essential 8 compliance timeline, reduce the time spent managing ongoing compliance, and safeguard your organisation.

CyberCX's Managed Controls solution leverages the power of Airlock Digital and Devicie capabilities to address the majority of the Essential Eight requirements for your end users.

What's included?

Application Control

Know what is executing across your device fleet and helps prevent attacks.

Strong Patch Management

Ensuring timely and appropriate Operating System & Third-Party application patching is handled.

Additional Endpoint Hardening

Ensure strong policies are in place to support E8 compliance, such as disabling Microsoft Office Macros.

Multifactor Authentication

Limit the effectiveness of Phishing attacks by requiring Multifactor Authentication for all users.

Restricting Privilege

Limit the attack surface and ensure appropriate auditability of administrative actions.

Critical to successful Essential 8 deployment is the planning, configuration, and monitoring of the majority of required end-user device security controls.

Leveraging Airlock Digital and Devicie, CyberCX's Managed Controls solution includes the design, deployment and ongoing management of key security controls across end-user devices on your network.

This Managed Controls solution will enable your organisation's security team to focus precious time and energy on your strategic priorities, knowing that you have taken proactive measures to keep your organisation, its systems and data, safe against this rapidly evolving cyber threat landscape.

Key points

The CyberCX Essential Eight Managed Controls service helps:

- ▶ Implement complete coverage for your end-user devices for the Essential Eight.
- ▶ Ongoing management and maintenance of each control over time.
- ▶ Appropriate reporting of control deployments and effectiveness.
- ▶ Evolve controls over time as your business changes.

Why partner with CyberCX for Essential Eight activity?

End-to-End Capability

From strategic advice, planning, implementation, and regulatory reporting deadlines, CyberCX can help you achieve Essential Eight maturity faster.

Experience & Expertise

Our team has extensive experience with the E8 since its release in 2017. We have tackled some of the most complex E8 deployments to date.

Trusted Partners

CyberCX has assisted dozens of organisations with their E8 programs. From discovery to assessment, we join our customers on their Essential Eight journey.

Managed but Local

Local presence and deep industry experience, providing actionable insights tailored to your organisation with operations sovereign to Australia & New Zealand.

Who should engage?

- ▶ Security leaders looking to reduce the burden of ongoing Essential Eight controls deployment and management.
- ▶ Government agencies looking to meet Essential Eight maturity requirements.
- ▶ Enterprises looking to meet a targeted Essential Eight maturity level across their organisation.

Why CyberCX?

When it comes to security you need an experienced partner, CyberCX is Australia's leading independent cyber security services company.

CyberCX delivers end-to-end cyber security services and Australia's best cyber security talent with the most comprehensive range of cyber security services to business, enterprise, and government.

Contact us to find out how CyberCX can boost the cyber security resilience of your entire organisation.
